

BikeLoudoun is pleased to present:

The Bicycling Advocate's Engineering Workshop

Conducted by **Fionnuala Quinn**

Civil engineer and member of the bicycling advocacy group, Fairfax Advocates for Better Bicycling (FABB), www.fabb-bikes.org

Date: Thursday, November 5th, 2009

Time: 6:00-8:30 pm

Place: Cascades Library Sterling, Virginia
21030 Whitfield Place
Sterling, Virginia 20165-7222

This workshop is designed to assist those who would like to play a constructive role and make suggestions for change during the design of new road facilities in Virginia.

One of the most effective ways to fix future problems for bicycling may be to **learn how to engage with the public hearing process and make the type of comments that can bring change.**

This workshop will provide step-by-step suggestions for looking at the design plans and coaching in the issues that are of concern when trying to advocate for better facilities for bicycles.
